

IP telephony systems

Designed for schools

What is VoIP?

VoIP (Voice over Internet Protocol) is technology that allows you to use your phones to make calls over the network instead of via a traditional analogue service.

A VoIP service can offer everything you typically get from your phone system and much, much more.

The LGfL VoIP system also boasts a wealth of special features tailor-made for use in schools through integration with your MIS.

"Modular, expandable, flexible and low cost. Genius!"

ICT Manager,
Merton School

Centrally Hosted Call Manager - frees schools from cumbersome hardware costs and expensive technical support contracts.

Competitive Call Rates - typically cheaper than land line based systems.

No Line Rental - calls are made via your broadband, making VoIP a great way to save money.

Links with your MIS

Impeccable Sound Quality - no more clicks, static or fuzzy lines.

Easily Scalable - add extra lines at any time.

Keep your numbers

Why LGfL VoIP?

Free Call Recording

Calls & voicemails can be saved as audio files on your computer for easy storage and future reference.

Easy Access to Contacts

The VoIP system will link with your MIS allowing easy access to all your contacts including parents.

Click-to-Dial Functionality

Never misdial again!

Call Log Tracking

Easily find and analyse data on the calls made.

Real-time Billing Information

Keep on top of spending.

Free Calls to Other LGfL VoIP Schools

You won't be charged to call other schools using the LGfL VoIP service.

Free Technical Support

Our UK based Service Desk is staffed by experts with experience of working in real schools.

User-friendly Admin Website

Manage your system easily online.

999 Alerts

Receive email or app alerts when a 999 call is made from your school.

No Expensive Call Management Hardware

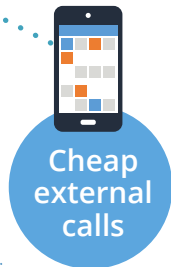

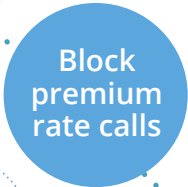

All of this is already provided and managed in the core of the network by LGfL.

Public Address Feature

Links with your existing PA system to allow live or pre-recorded school announcements to be made. (Optional extra)

How VoIP can save you money

The VoIP website puts you in control of your system

A dedicated website lets schools manage and configure their own service. Additional technical support is provided by AdEPT's team of skilled engineers.

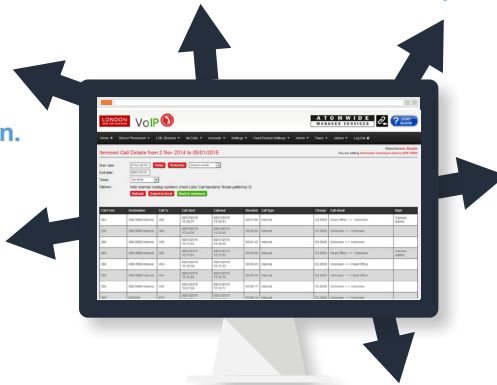

The dedicated website lets you:

Access all your contacts, including parents, staff and relevant third parties.

Listen back to previous calls.

Access real-time billing information.

Send faxes.

Use the built in click-to-dial feature to dial a number with the click of a mouse.

Block premium rate or international phone calls on selected handsets.

"The functionality of the LGfL VoIP management site is fantastic. It's accurate and responsive and most importantly, tells you what you want to know! It makes such a difference."

Newham LA

What you need

LGfL connected schools only need to purchase handsets and the relevant licences*.

A wide range of feature-rich Cisco handsets that can support any school's requirement is available.

For the complete range of handsets please take a look at our shop:
<https://shop.atomwide.com/>

*Please note the purchase of managed switches may be necessary.

Licensing service levels:

Basic:

- Handset with their own extension numbers but no direct dial (DDI) capability
- Allows handset to make outgoing calls
- Offers integration of 'Click-to-dial' (not on all handsets)
- Call recording can be enabled (if supported)
- Intercept ('pick-up') unanswered colleagues calls

Standard:

- Provide all Basic-level functionality
- Allows handset to have an external DDI number
- Allows handset to be part of a hunt group

Enhanced:

- Provides Basic and Standard functionality
- Adds voicemail for the handset's extension
- Enables Point-to-Point video conferencing to take place on suitable handsets

Deluxe:

- Offers all Enhanced-level functionality
- Links up to three additional handsets with Deluxe handset

Schools may have the option of purchasing their VoIP equipment over a 3 year 0% finance agreement with Cisco. Please ask if you would like more information on this offer.

How is VoIP Set Up?

Once you've decided which handsets are needed they'll be pre-configured ready for use at your school when they arrive.

Our engineers can provide a full installation service or this can be done by your own technicians.

Once installed your phones are usable straight away.

The school's administrator can add new phones into the system and configure features via the easy-to-use management website.

Integrates with your MIS

The LGfL VoIP system securely integrates with your school's MIS with the use of USO-AutoUpdate. This free piece of software allows for the frequent and regular updating of data, meaning that your contacts and their details will always be kept up to date.

What should I do next?

Book an appointment to discuss the LGfL VoIP service in detail. We can offer an in-depth evaluation highlighting the special functions and features VoIP has over your current system and a bespoke cost comparison showing you how much you can save.
